

STUDENT ASSISTANT OPPORTUNITY IN QUANTUM FIELD

- Are you a student in quantum science?
- Are you interested in participating in Quantum Korea?
- Would you like to meet and network with leading Danish quantum experts?
- Are you proficient in English and able to guide and assist international researchers and companies during their participation in Quantum Korea?

Innovation Centre Denmark Seoul is leading a Danish delegation of quantum researchers and companies to Quantum Korea 2024. We are looking for motivated Korean students to assist our delegates during their participation in Quantum Korea and serve as local navigators to the Korean quantum ecosystem.

Benefits of Joining the Delegation:

- Network with leading Danish quantum researchers and companies
- Free entrance to Quantum Korea 2024
- Engage with both Korean and Danish quantum stakeholders
- Compensation for your time (150,000 KRW per day)
- Participation in networking lunch

Requirements:

- Pursuing a degree in the quantum tech field (bachelor, masters and PHDs welcome)
- Proficient in English
- Comfortable with occasional translation tasks
- Ability to independently interact with the delegation and provide guidance during the conference

We are seeking students with a strong interest in the quantum field, who views this as an opportunity to enhance their network and knowledge. While we may not require your attendance for all three days, we prefer candidates who are available for the entire duration if needed.

If you are passionate about quantum technology and eager to be part of this exciting event, we encourage you to apply through this link:
